ABSTRACT

This book by a Montessori educator provides ideas and suggestions for parents, extended families, preschool teachers, and anyone who wants to gain a simple understanding of how and when to relate to a toddler in a supportive, not destructive, manner. The book addresses how to communicate with toddlers, how to avoid and resolve emotional conflict, how to prevent and heal attention and speech challenges, and how to develop a teaching relationship with your toddler and create a supportive home learning environment. Included are 125 activities that advance toddlers' concentration, verbal skills, and fine motor development. (EV)
